CHANGE THE SETTINGS FOLDER

- 1) Click Win + R (the «Run» window opens), enter regedit, press «OK» or «Enter».
- 2) Expand the HKEY_CURRENT_USER section, left-click on the Software section and create the «Sergey Govorunov» section.
- 3) Go to the created section, create a string parameter named «Settings».
- 4) Double click on the created parameter, enter the new path for settings in the «Value» field in the window that opens.
